.

DETAILED ACTION

- 1. The replacement drawing sheets filed 5-18-2005 are acceptable.
- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 3-5 and 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation "said first and second bottom surface patterns are selected from the group consisting of a flat pattern" in claims 1, 5 and claim 10 is vague and indefinite because the first bottom surface pattern has been defined as "having a plurality of projections" and therefore cannot be "a flat pattern" as claimed. Therefore, "flat pattern" must be excluded from "the first bottom surface pattern". Furthermore, in claim 9, the terms "said first compartment" at line 3 and "said second compartment" at line 4 have no proper antecedent basis. It is also suggested the term "a plurality projections" at line 4 of claim 1 be rewritten as "a plurality of projections" instead. Clarification and correction are required.

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/729,687

Art Unit: 3742

5. Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hopkins (US 6,187,354) (previously cited), in view of Chiba (5,229,564) or Frankowski (US 5,062,356) (both newly cited).

Page 3

Hopkins shows in Figure 13, a microwave cooking tray, comprising: a base 12 having a plurality of compartments, each compartment 18 having a bottom surface, the bottom surface of a first compartment having a plurality of first projections arranged in a first bottom surface pattern, the bottom surface of a second compartment having a plurality of second projections 20 arranged in a second bottom surface pattern and a covering 14 secured to said base and sealing each compartment. Although it does not show each of said first projections has a shape distinct from a shape of each of said second projections, it shows a different pattern projection arrangement in each of the compartment; that is, one has 7 ribs and the other one has only five. Also, the ribs are of different lengths. Chiba shows a microwave tray 1 with plural compartments (recesses 2) for many food objects. The recesses 2 may be formed with different bottom shapes for molding different food objects (see Figures 1-9). Frankowski also shows a baking tray having molds of different shapes (see Figures 2 and 3). It would have been obvious to an ordinary skill in the art to modify Hopkins to form each bottom surface with different shapes so that food of different shapes can be formed by baking, in view of the teaching of Chiba or Frankowski. In regard to claim 10, the exact shapes would have been a matter of engineering variations depending on the food objects to be heated. In regard to claim 11, Hopkins shows the use of vents 35 (see Figures 3-6).

Application/Control Number: 10/729,687

Art Unit: 3742

6. Claims 1, 3-5, 7 and 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Page 4

- 7. Applicant's arguments with respect to claims 9-11 have been considered but are moot in view of the new ground(s) of rejection. The claimed arrangement for the bottom projections having different shapes in new claims 9-11 is only seen as a matter of design for different food objects having different shapes, as there is no requirement in the claims that the bottom shapes are designed for optimal cooking of the different food types to be cooked as in claims 1 and 5.
- 8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
